

# Meadows Productivity Suite

*Developed by Meadows Publishing Solutions*

## About

The Meadows Productivity Suite (or *MPS Pro Suite* for short) is a new set of powerful software utilities developed by Meadows Publishing Solutions [www.meadowsps.com](http://www.meadowsps.com) and designed to assist with various publishing tasks in Adobe InDesign. Please read below to learn about how to install the MPS Pro Suite on your system, and how to access the support and training materials for the software.

## Installation

To install the MPS Pro Suite software, start by quitting your Adobe InDesign application. Then, run the installer software and follow the prompts. When prompted, choose the version of Adobe InDesign that has been installed on your workstation. The installer will automatically place the MPS Pro Suite software into the correct location on your system.

## Activation

After installing the MPS Pro Suite, simply start your copy of Adobe InDesign. You will be prompted to activate the software. Activation requires an **Order Code**, which you should have received via email. If you do not have a valid Order Code, please visit [www.meadowsps.com/mpsproregistration](http://www.meadowsps.com/mpsproregistration) to request one. Once activated, you should see a menu item called “Meadows” at the bottom of the Adobe InDesign “File” menu. If you do not see this menu, please feel free to open a support ticket by visiting the Meadows online support center at [www.meadowsps.com/support](http://www.meadowsps.com/support).

## Documentation

Complete documentation for the MPS Pro Suite, including the product manual, tutorial files, and a demonstration video, are available at the [www.meadowsps.com/mpsprodownload](http://www.meadowsps.com/mpsprodownload) web page.

## Thank You!

Thank you for your continued support of our software products for Adobe InDesign!
