

Bar Code Fonts for Use With DesignMerge Software

Font Pack Version 1.03, Released March 26, 2024

If you have purchased a license to the Bar Code Bundle for DesignMerge software, you must install the provided set of bar code fonts. These fonts have been provided in the **Required Fonts** folder that is included with this document. Please see the **FONT INSTALLATION** section below for more details.

OLDER VERSIONS OF DESIGNMERGE SOFTWARE

Starting with **DesignMerge for Adobe InDesign 2022**, we have implemented a brand new method for producing linear bar codes. This new method requires the new set of bar code fonts provided with this download. Please see below for more details, including a number of links to documentation and training videos. [[If you are running InDesign 2021 or any older version, please click here for more information.](#)]

BAR CODE DOCUMENTATION

For more information about how to create variable bar codes with DesignMerge software, including access to a full training video, please visit the following link:

<https://www.meadowsps.com/barcode-documentation>

If you are upgrading from an older version of DesignMerge software (from InDesign 2021 or earlier), please see the following link for information about how to convert your older **Keyword Link** style bar codes into the new **Barcode Link** format:

<https://meadowspshesk.com/knowledgebase.php?article=310>

FONT INSTALLATION

All fonts have been provided in *Open Type* format only, and are **compatible with both Macintosh and Windows systems**.

REQUIRED FONTS

The set of bar code fonts that have been provided in the **Required Fonts** folder must be installed in order to work with the Bar Code Module for DesignMerge software. Please install all of the fonts that have been provided in the **Required Fonts** folder into your system before working with DesignMerge software to create variable bar codes.

OPTIONAL FONTS

USPS IMB Fonts

The USPS Intelligent Mail bar code fonts have been provided for convenience. These fonts are publicly available from the [USPS web site](#). The fonts have been provided in their original *True Type* format, and have also been converted to *Open Type* format for convenience.

The USPS IMB fonts are provided for use under the software license provided by the USPS. If you prefer, please visit the [USPS web site](#) as newer versions of these fonts may be available.

DataBar Fonts

A set of DataBar fonts have also been provided for use in creating GS1 DataBar barcodes. Support is available for various DataBar barcode formats including Standard, Expanded, Stacked and Coupon.

The DataBar barcode format has not yet been integrated directly into DesignMerge software, but can be implemented using a DesignMerge *Custom Action*. If you have a need for variable DataBar barcodes, please open a [support ticket](#) and provide additional details about your specific requirements.

LICENSE INFO

Each license of the DesignMerge **Bar Code Bundle** includes a royalty-free license to use the provided set of barcode fonts and other components licensed from IDAutomation.com, Inc.

These fonts may only be used with DesignMerge software or with other OEM versions of DesignMerge software, including but not limited to **EngageIT VDP** and **AccurioPro Variable Data** software.

The fonts are not licensed for and cannot be used with any other software applications.
